

# EPCwin 3.61-09

## Update procedure

### EPCwin Update to Version 3.61-09

The Update from Version 1.x/2.x to Version 3.x must be paid for and requires new passwords.  
To ensure that the update is properly installed, please **read all of this text**.

### List of EPCwin Versions with corresponding update possibilities

From Version	To Version	New permanent passwords?	Required Wibu-SYSTEM Version	Must be paid for
1.06-01	<b>2.00-01</b>	Yes	3.30 and higher	Yes
2.00-0x	<b>2.50-04</b>	No	3.30 and higher	No
2.50-04	<b>3.00-01</b>	Yes	5.00 and higher	Yes
3.00-01	<b>3.50-08</b>	No	5.20 and higher	No
3.50-06	<b>3.61-09</b>	No	<b>CodeMeter 3.30 or higher</b>	No

### Update requirements:

- **The new hardware dongle Wibu-SYSTEM CodeMeter.**
- If your current version is smaller than 3.00-01, this version is NOT free of charge for you. Please contact ZSK (Atelier@zsk.de) for the new passwords before you install this update. Otherwise you cannot work anymore!
- Please download and install version 3.30 or higher of the Wibu-System CodeMeter security software!
- Please consider the new minimum conditions for your system in the document EPCwinOptions35GB.pdf

### Update process

- Backup your EPCwin data and parameters
- Uninstalling the current wibu-SYSTEM security Software
- Download and install the EPCwin update Software
- Replace the updated True-Type Monogram Font Files
- Installation of the new Wibu-System CodeMeter Security software

### Update of the EPCwin software:

- **Attention:** Please do a backup of your EPCwin data, TT-Monogram fonts (*EPCwinData/GiSFonts*) and system parameters before you start the update procedure!
- Uninstall the Wibu-SYSTEM security software
- Please request the necessary password for decoding under [Atelier@zsk.de](mailto:Atelier@zsk.de) for the update.
- Please download the file named **EPCwin Update to Version 3.61-09.exe** and save it on your computer.
- It will be automatically unzipped per double-click after the password has been entered; a directory named **InstUpdtPrg** is created.
- This directory contains a program called **Setup.exe**. Double-clicking this program starts the update routine. Follow the instructions that appear on the screen.
- During the update procedure, there were installed updated True-Type Monogram Font Files *../EPCwin/GiSFonts350\_05*.  
Should you like to use those updated fonts in EPCwin, please copy all or just individual TT-monogram font files into your data directory. Please note here that fonts which you have possibly revised will be written over, if you file them under the same name.  
As a rule, the copy procedure looks as follows: *Programme/EPCwin/GiSFonts350\_05* to *../EPCwinData/GiSFonts*.  
Please check and adjust after the first program start in *Utilities => Standard settings => Data paths* the path for the TT-Monograms e.g. on *../EPCwinData/GiSFonts*.

- During the update procedure, there were installed updated True-Type Monogram parameter files *../EPCwin/GiSFontParameter350\_05*. Should you like to use those updated font parameter in EPCwin, please copy all TT-monogram font parameter files into your directory. Please note here that font parameter which you have possibly revised will be **written over**. As a rule, the copy procedure looks as follows:  
*Programme/EPCwin/GiSFontParameter350\_05/\*.\**  
to *../EPCwin/EpcSystemDaten/Configuration/GisMonoConfi/*.

### Installation of the Wibu-SYSTEMS CodeMeter security software:

- You will find the file CodeMeter\_3.30.exe on this page. Download this file and save it on your computer.
- It will be automatically unzipped per double-click and the setup will be started. Follow the instructions that appear on the screen.

### Concluding update procedure

Once the updates have been properly installed, you can start EPCwin in the usual way; the existing customized settings are retained.

**The New functions and improvements you can find in the document EPCwinNews361-09GB.pdf !**
