

START KEY = APPLIQUÉ KEY

Did you know this T8 function yet?

What?

When the start button is pressed, the appliqué button function is executed beforehand.

Why?

For adding appliqués, the pantograph is manually moved forward. By pressing the blue button (appliqué button), the pantograph moves back to the last known position to continue embroidery at the correct position and to avoid collisions. Activating „Start key = Appliqué key“ makes this step unnecessary.

How?

Beginning on the start screen, press L2 > R1 to enter the operating modes setup. Check the Checkbox at R5 to activate the function.
