# BARCODE MONOGRAM

Did you know this T8 function yet?

Did you know?

What?
With the internal monogram mode, you can easily turn your text into a scannable barcode and embroider it onto your textile.

Why?
This feature offers versatile benefits: use it for clear and professional product labeling or add a unique, eye-catching detail to your clothing designs.
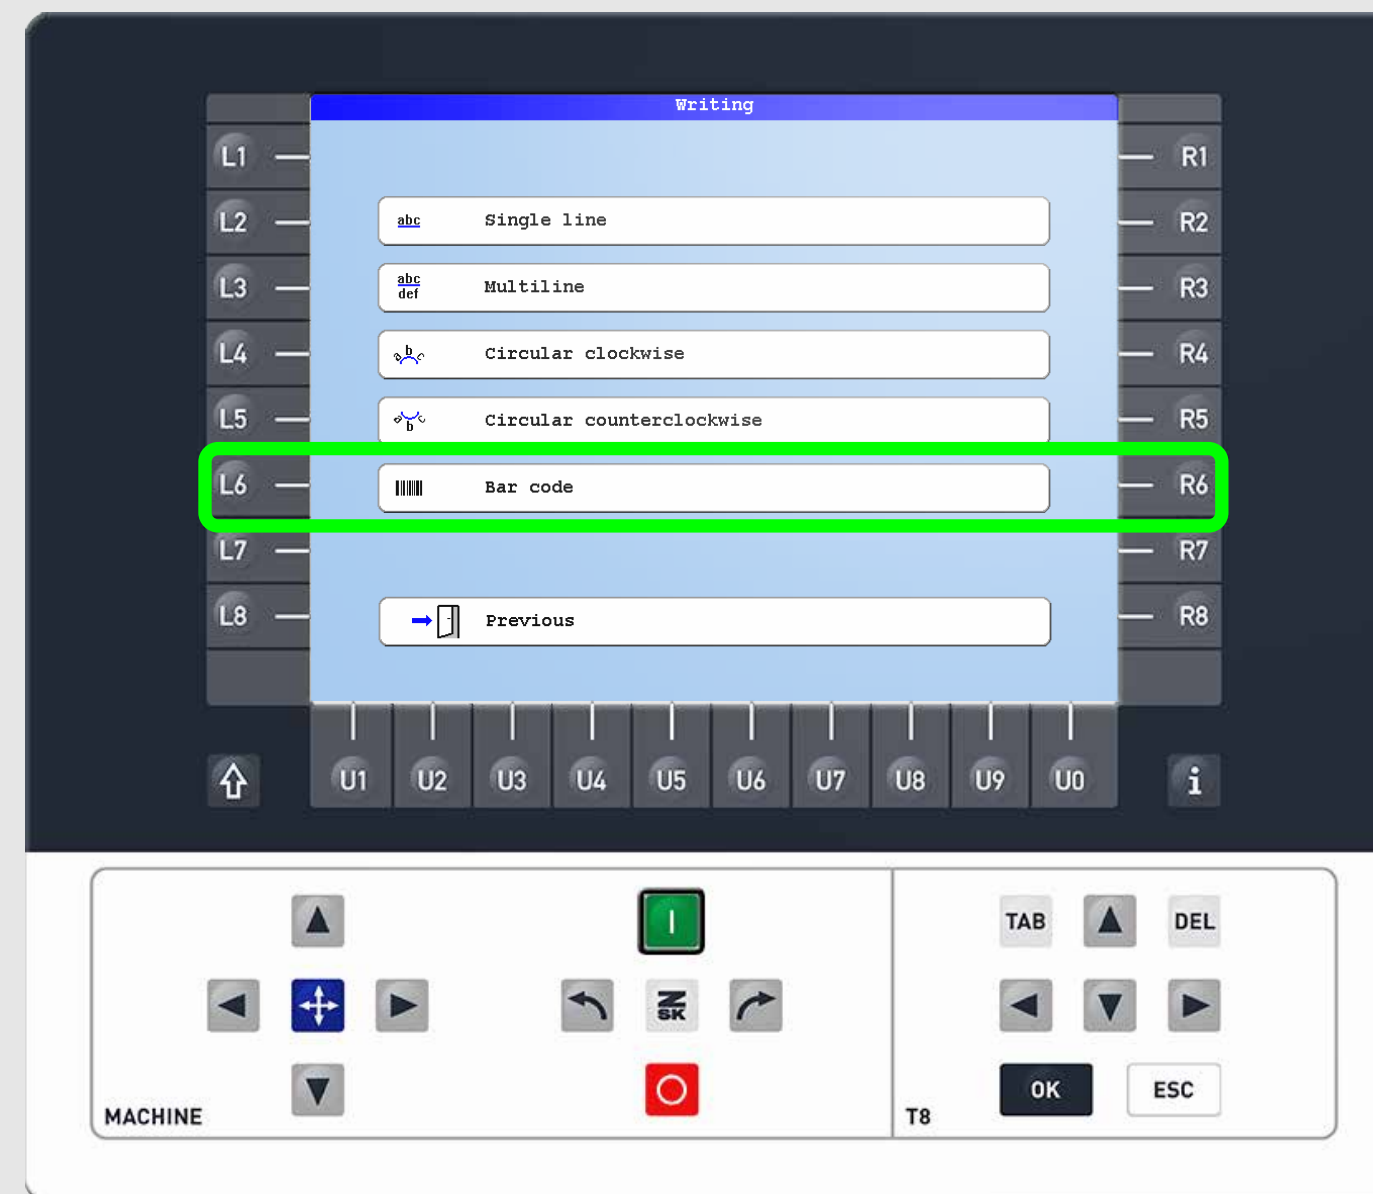

Requirements
internal monogram need to be activated in the software settings: **L7 > R4 > R1 > Internal writing**

Step 1
*On the start screen press R1 to open the displayed U-bar.*
Press the U6 function key to enter the „Writing" tab.

Step 2
Press the L6 or R6 function key to select „Barcode".

Info: A barcode is much more efficient to embroider than a QR code, requiring fewer stitches and minimizing thread cuts.

Step 3
Enter the desired text for the barcode and confirm by pressing OK.
Afterward, save and load the design as usual.
