

DUAL TASKING

Did you know this T8 function yet?

What?

While the machine is embroidering, the operator can use the T8 controller to set up and prepare upcoming designs, maximizing productivity.

Why?

The machine's up-time can be utilized efficiently, significantly reducing down-time for setup. Check out example use-case on page 2 for more details.

How?

Use the L4 function key to load another design during embroidery operation.

Avoid using the R function keys, as they are linked to the currently running design.

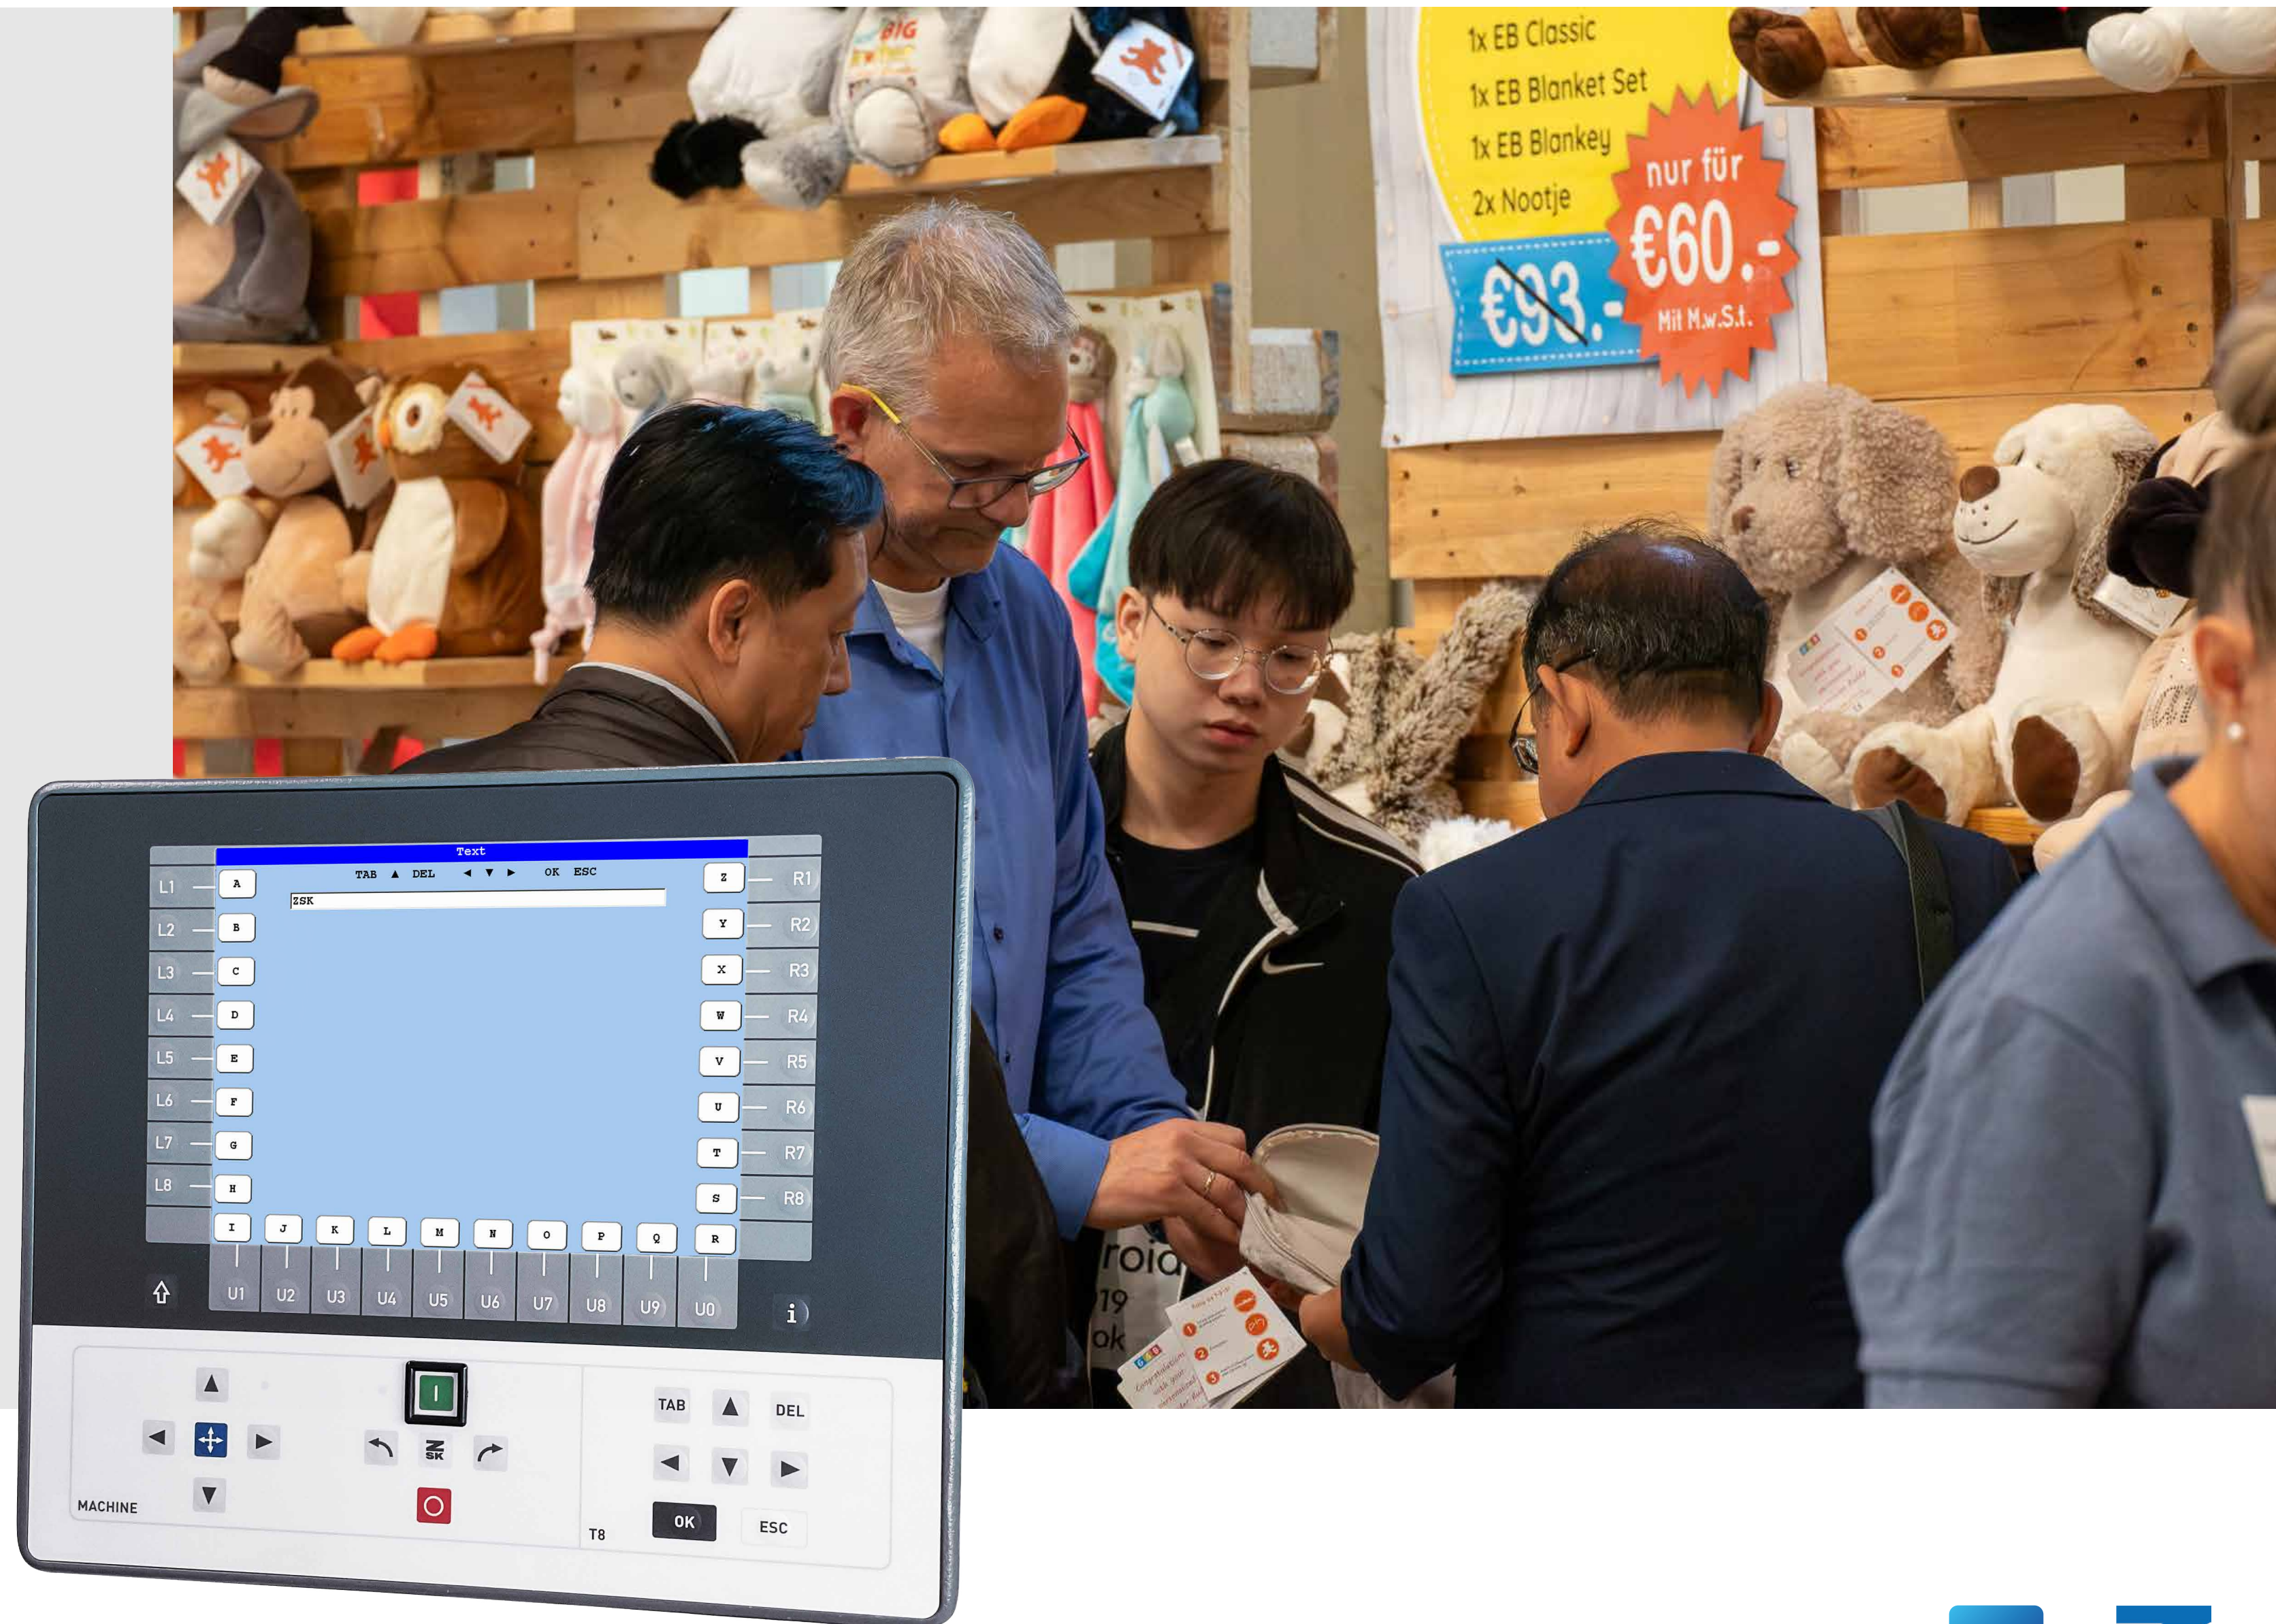

Other dual task possibilities

- Create guidelines
- Design repetitions
- Edit designs while loading or in the editor
- Set up stop preselection
- Customize monograms

Use Case

Selling individualized embroidered products on a market with internal monograms

- Customize and visualize monograms on the T8 in front of the client during embroidery.
- Streamline process: no need for clients to return twice – once for setup and again for pickup.
