

WIRELESS NETWORKING

Did you know this T8 function yet?

What?

Your ZSK embroidery machine can be integrated wirelessly into your network.

Why?

Set up or rearrange your production without installing network cables throughout your facility.

How?

Use an external Wi-Fi adapter with a USB power supply and a LAN port. Set up the adapter and connect it to your desired network – according to the manual of the network adapter. Connect it to the USB and network socket of the T8 controller.

Reliable operation requires a strong Wi-Fi signal, a suitable network setup, and a quality adapter.
