T8-Machine Password

Fundamental Informations

Download Software-Updates: https://www.zsk.de/t8-software-en.html

YouTube Video, Install Software Update: https://www.youtube.com/watch?v=JNCRShq8pKk

NOTICE

All discribed functions of the control unit T8-/T8-2 will be started at the Base Screen (BS).

The keys used in the function descriptions are shown in the above T8-/T8-2-figure.

General

In case the machine, once a recent-generation MSCI-control has been powered up, issues an error message concerning an outdated user authorization or refuses access, the following instructions explain how to re-enter the machine password.

Avoid adjusting the date unnecessarily because this can lead to the loss of your access authorization. You can adjust the date once by ± 1 day.

Machine passwort conflict

Machine password conflicts are made evident once the machine is started.

• Switch on the machine at the main switch.

	Control unit fault				
	Number: 102 Farsmord will expire on: 10.10.18 (2000) (Hachine will stop) Flease contact your local distributor				
	Make note for service inquiry: ▶ T85W3502 PASSWORT.C 3828 ◀				
5	Language Confirm				
-					

- ⇒ During the startup of the ZSK machine software, the dialog *Control unit fault* is displayed:
- ⇒ The message indicates the remaining production period (expires on date/time indicated by xx.xx. xx / xx:xx) or that your user authorization has already expired.
- Press **[L8]** *Language* to display the message in another language.

From four weeks before expiry of the user authorization, a message is displayed each time the machine is switched on and again at midday. The user authorization expires at midday on the indicated date.

Control unit fault		
Parmord vill expire on: 10.12100 (Michine will stop) Please contact your local distributor Make note for service inquiry: 2		
S Language Confirm <	$\boldsymbol{<}$	

- Record the marked information (1)-(2) from the message window.
- Press **[R8]** Confirmation to hide the message.

- The T8 base screen is displayed.
- Press [L1] Machine informationen.

In the dialog *Machine Information* press the key **[L8]** *Machine password*.

Machine password			
Machine number:	00099999-10-000		
Current system date:	10.10.2018		
Password expires on:	10.10.2018		
Password 1:			
Password 2:			
Password 3:			
Accept passwort	revious		
12345	6 7 8 9 0		

- ⇒ The cursor is in the entry field *Password 1*: to enter the first part of the password (11 digits).
- Use the keys **[U1]-[U0]** to enter the 1st sub-password supplied by ZSK Sales in the first line.
 - ⇒ The cursor jumps to the input field *Password 2*: to enter the second part of the password (11 digits).
- Use the **[U1]-[U0]** keys to enter the 2nd subpassword in the 2nd line.
 - ⇒ The cursor jumps to the input field Password 3: to enter the third part of the password (10 digits).
- Use the **[U1]-[U0]** keys to enter the 3rd subpassword in the 3rd line.

NOTICE

The input process can be canceled at any time by pressing the Button [R8] Previous.

If an incorrect password entry is detected, the cursor can be reset to the associated defective password entry field using the keys **[L4]-[R4]**, **[L5]-[R5]**, **[L6]-[R6]**. The cursor can be moved to the left and right within the input fields using the cursor keys **[\blacktriangleleft]** and **[\triangleright]** of the T8 control unit. The key **[DEL]** can be used to remove numbers to the left of the cursor and replace them with the correct number(s).
